PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building intelligent systems using Machine Learning, Deep Learning, NLP, Computer Vision, and Generative AI. Skilled in Python, Retrieval-Augmented Generation (RAG), and semantic search pipelines, with experience training and evaluating machine learning models.

EDUCATION

GLA University, Mathura

B.Tech in CSE (Hons.) with Specialization in AI & Data Analytics

May 2023 – May 2027

SKILLS

AI/ML: Machine Learning, Deep Learning, Neural Network(CNNs, RNNs, LSTM), Computer Vision, Natural Language Processing (NLP), Transformers, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs)

Frameworks & Libraries: TensorFlow, Keras, scikit-learn, MediaPipe, OpenCV, HuggingFace Transformers, LangChain, NumPy, Pandas, Streamlit

Programming Languages: Python, Java, Object-Oriented Programming (OOP), JavaScript, SQL

Tools: Git/GitHub, Visual Studio Code, Google Colab

PROJECTS

Veritas: Multi-Agent RAG-Based Fact Verification System | GitHub

March 2026

Role: AI Engineer

Python, RAG, LangChain, FAISS, Transformers, Wikipedia API, Gemini API, Pydantic, PyPDF2

- Engineered a multi-agent RAG-based fact verification system that performs claim extraction, semantic retrieval, evidence ranking, and automated verdict generation using retrieved knowledge from Wikipedia.
- Implemented semantic chunking, vector search, and MMR-based retrieval to improve evidence relevance, generating evidence-grounded verdicts with confidence scores while reducing hallucinations through retrieval-augmented generation.

Sauron: Traffic Management System | GitHub

Dec 2024

Role: AI Engineer

Machine Learning, Random Forest, Python, Streamlit

- Designed and trained a Random Forest model to dynamically optimize traffic signal timing at a four-way intersection, reducing static wait-time inefficiencies achieving an R^2 score of 0.977.
- Implemented YOLO-based real-time vehicle detection to classify high- and low-traffic lanes, feeding live signal-timing decisions.

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900)

May 2024

Microsoft

CS50P: Introduction to Programming with Python

June 2024

Harvard University

Machine Learning with Python

June 2025

FreeCodeCamp

- Project:** Book Recommendation System – KNN | GitHub

Supervised Machine Learning: Regression & Classification

July 2025

DeepLearning.AI — Coursera

COMPETITIONS & EVENTS

Reckon 6.0 [Top 10]

March 2025

JJET, Jodhpur

RPC (Rapid Prototyping Camp)

August 2024

SJB Institute Technology, Bangalore organized by Intel Unnati Edulateral Foundation

Tech Fest

February 2025

GLA University, Mathura
